结合项目山地高差营造舒适的低密度居住体验。

竹径云山既现代感十足,又充满经典的东方韵味。竹林、闲径、幽云和烟山共同营造出了诗意的居住体验。低密度住宅区的景观设计借鉴了中式的“里弄”概念,成组团式的院落空间。窄巷和高篱在空间上加强了庭院私密感,其快速通过性也减少了人为噪音的打扰。

To create a comfortable and lowdensity living environment for residents while accommodating the changeable mountain topography.

The project has a modern style with a feeling of classical orientalism. It aims to create a poetic living experience which includes elements of bamboo forests, paths, clouds and mountains. In the low-density sections the design has been shaped by the concept of Chinese 'lanes and alleys' to deliver a more communal, grouped effect for residents to enjoy. Narrow lanes and high fences reduce the disturbance of manmade noise and enhance the privacy of these courtyards.

PEOPLE FOCUSED **FUTURE DRIVEN**. 聚焦人本 预见未来。
